We Have Over 25 Years of Customer Satisfaction

DIE-TECH was founded in 1980 to provide precision and consistent quality products for the biomedical, electronic, optical, and semi-conductor industries. Located in the heart of Silicon Valley, our 2800 sq. ft. company-owned facility offers everything from small to large volume production to quick turn-around prototype machining. Our precision CNC milling, turning, grinding, and EDM wire/sinker capabilities

offer our customers the opportunity to take on all projects. DIE-TECH has over 25 years of experience and all the latest technologies you look for in a manufacturer. Our modern, state-of-the-art facility combined with a team of experienced personnel ensures consistent production of high quality parts that meet today's demanding delivery schedules while maintaining competitive prices.

Convenience and Quality

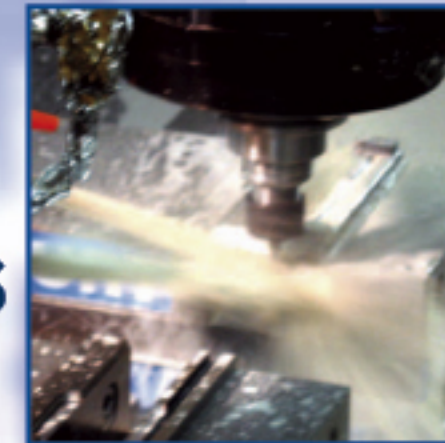

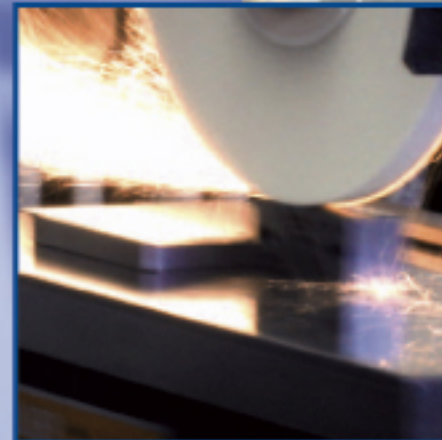

Our CAD/CAM programs allow us to machine all 2D and 3D projects. We also offer easy file transfer over our DSL network. DIE-TECH is experienced in working with all steels, stainless steels, aluminums, and plastics with extreme precision. Our trained staff has the skills and experience to handle large and small scale projects. With our in-house and alliance services, we offer a wide range of services including:

Welding	Jig Grinding
Heat Treating	Surface Grinding
Water Jet	Double Disc Grinding
Lapping	Specialized Plating
Gun Drilling	Sheet Metal Fabrication
Polishing Cutting	Micro Hole/Micro Wire EDM
Turning	Wire/Sinker EDM
Tube Bending	

High quality machine shop services start with the best possible relationship with our customers.

DIE-TECH has the years of
experience
and the
latest technologies
you look for in a
manufacturer
who can fabricate
quality
efficiently.

Our Services Ensure Quality

DIE-TECH takes pride in ensuring that all work is inspected by our trained, Quality Control staff. Our commitment to quality means that your parts go through a rigorous quality control system eliminating costly delays and downtime. Our

inspection area contains state of the art inspection equipment including our Coordinate Measuring Machine (CMM) and our optical comparator.
